

# NEXT GENERATION EV CHARGER

For Installers

***“I COULDN'T BELIEVE HOW QUICK  
AND EASY VEVA WAS TO FIT AND  
COMMISSION” - ALEX, EGE LTD***

# SAY GOODBYE TO LENGTHY INSTALLATION AND COMMISSIONING TIMES.

## SAY HELLO TO VEVA

If you're a busy installer who likes to leave a job well done, then VEVA is a great choice of EV charger. VEVA's many features make installation quicker, such as spacious access to the large terminals, built-in PEN protection and its own Wi-Fi hotspot – typically reducing time on site by an hour.

Marlec Renewables proudly presents VEVA EV charger and mobile app, the next-generation adaptive, domestic, smart, EV Charger manufactured in the UK.

# DESIGN AND SAFETY FEATURES TO ENHANCE THE INSTALLATION EXPERIENCE

## ROBUST AND THOUGHTFUL HARDWARE

VEVA is more than a high-functional charging device, it's thoughtfully designed and robustly constructed with captive screws, mini spirit level, multiple cable knock outs, Wi-Fi module, CT clamp, cable protector, seals, glands and wall fixings all supplied as standard.

## SAFETY MONITORING IS BUILT-IN

VEVA has the electrical PEN safety requirements covered, eliminating in most cases the works associated with an earth rod installation. For a simpler, smoother and faster installation.

## LOAD BALANCING

Using the clamp supplied, monitoring of the grid is quickly and simply set up on the app to ensure VEVA protects the property from exceeding its fuse rating whilst charging, tapering the charge if necessary.

## COMPATIBLE WITH PV

VEVA offers a range of customisable charging modes set-up via the app. Utilising the bi-directional CT clamp, excess PV energy generated can be diverted to the vehicle to reduce charging costs.

## COMPLIANT AND FUTURE-PROOFED

VEVA is Smart Charge Point regulations compliant, employing encrypted over-the-air programming to automatically update its firmware. This ensures the device remains current with the latest software, maintaining the optimal performance available.

# VEVA 7.4 kW DOMESTIC EV CHARGER MODELS

## VEVA TETHERED

- ◇ VEVA tethered charger supplied with 8m cable and Type 2 charging plug as standard
- ◇ Built-in holster to stow the plug when not in use

# ONCE INSTALLED AND COMMISSIONED VEVA OWNERS ENJOY....

- ◆ **INTERCHANGEABLE FASCIAS**  
Customise VEVA's fascia to the desired style using the 2 options supplied or simply order the fascia accessory for more mix and match options. No unsightly screen or buttons, enhancing security against unauthorised charging.
- ◆ **WI-FI CONNECTIVITY**  
Every VEVA comes equipped with built-in WiFi ensuring easy connection to the VEVA mobile app for seamless control and monitoring at home or away.
- ◆ **VISUAL CHARGING INDICATOR**  
Multi-coloured LED light ring indicates charging status for intuitive feedback. LED's automatically dim at night and are adjustable on the app.
- ◆ **GENEROUS 8M POWER CABLE ON THE TETHERED MODEL**  
Conveniently long reach cable can be reduced to the required length and the complete cable wraps neatly around the charger's shell maintaining VEVA's attractive profile and keeping the driveway tidy.

## ADJUSTABLE PRICING FOR ACCURATE REPORTING

Using the Veva app, the EV owner can manually set weekday and weekend pricing, enabling accurate reporting on daily and monthly charging costs. If electricity prices fluctuate, the app allows them to easily adjust these settings at any time, ensuring they stay in control of their charging expenses.

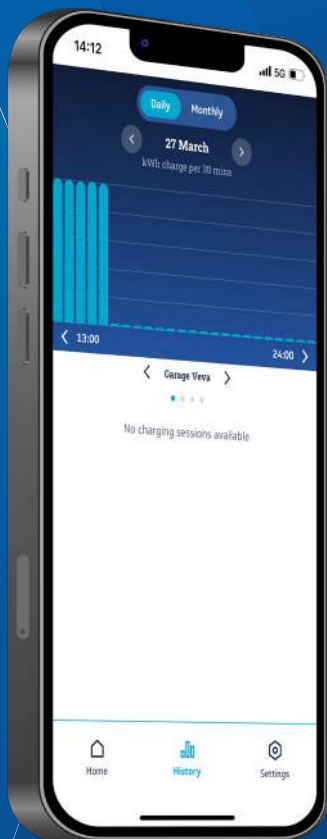

## REAL-TIME DATA

View real-time charging status, monitor charging performance and charging history with the Veva mobile app.

## CHARGING FROM THE PALM OF YOUR HAND

Our intelligent mobile app grants complete control to the EV owner, allowing them to easily manage and adjust their charging status. With a simple press of a button, they can boost or pause charging for convenience and flexibility.

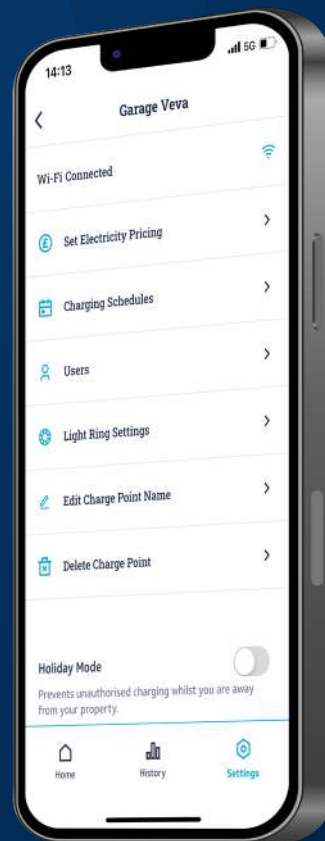

## CHARGING HISTORY ANALYSIS

We make charging analysis easier. Filter by day or month and drill into how much each charge costs, the added kWh and charge duration.

## FULL ACCESS AND CUSTOMISATION

With absolute access, the EV owner has the freedom to customise the charger settings according to their preferences. They can modify features such as Charging Schedules, user list, and Charger Name. Additionally, the 'Holiday Lock' mode ensures the charger's protection regardless of their location, providing them with complete control and peace of mind.
