

INTRODUCING THE BIRDBLOCKER BB85: Advanced Bird Proofing for metal roof, corrugated & low mounted Solar Installations

Innovative Solutions for Optimal Performance

At BirdBlocker, we are committed to pioneering bird proofing technologies that safeguard your solar installations. Our latest innovation, the BB85, is designed to provide robust and enduring protection for metal roofing, corrugated roofs, steel decks, and low-mount systems. With its 85mm height, the BB85 effectively spans heights up to 80 millimeters, ensuring comprehensive coverage and protection.

Enhanced Ventilation and Performance Protection

For installations with narrow spacing, effective ventilation is critical. The BB85 addresses this by preventing nesting birds from compromising your system's efficiency. Nesting birds can lead to significant performance issues such as hotspots, reduced lifespan, and increased fire risks. The BB85 is the next evolution in our proven prevention solutions, ensuring your solar panels operate at peak performance.

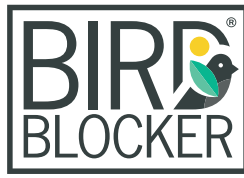

Elevating Hygiene Standards

The BB85 is crucial for maintaining hygiene in sensitive industries such as food processing, agriculture, and healthcare. By preventing birds from nesting, BirdBlocker BB85 helps:

- Eliminate parasite infestations like red mites & ticks.
- Deter predatory rodents by removing their objective.
- Minimize the spread of viruses (avian flu) and bacteria.
- Avoid contamination from fungi and bird droppings.

Universal Compatibility and Long-Lasting Durability

The BB85 is universally compatible with all common solar panel designs, whether traditional or box-design frame. The BB85 is only available pre-clipped, ensuring a secure hold for decades. Like all BirdBlocker products, the BB85 is designed to withstand the elements, being fully UV-, frost-, and heat-resistant. This durability is backed by a ten-year product warranty and a life expectancy measured in decades.

Product specifications

- Needle Length: 85 mm
- Stability: Interconnected needles with a bridge
- Maximum Cover Height: 80 mm
- Strip Width: 50 cm
- Material: Black UV-resistant, recyclable HDPE
- Mounting Clips: Preclipped stainless steel & compatible with all BB-boxclips
- Pack Size: 30 meters
- Product Code: BB85evo-30c
- EAN Code: 8785253122588

Enhance the protection against external threats, safeguard performance and improve longevity of your solar installations with BirdBlocker BB85.
