KeContact Pedestal

The solution for flexible
and simple installation
of KEBA wallboxes

The KeContact free-standing column is the sophisticated and flexible solution for the free-standing installation of KEBA Wallboxes.

Maximum flexibility and barrier-free

Suitable for both KeContact P30 and KeContact P40 single and double mounting on the pedestal is possible. The mounting height of the wallboxes also already fulfils the future legal requirements for accessibility*.

The hole pattern of the base plate corresponds to that of the KEBA KC-P30 pedestal. The pedestal is therefore fully compatible with already existing foundations or base plates. Installations can be quickly replaced or extended.

Sophisticated design

The basic parallelogram shape gives the column a special dynamic. This shape means that the plug holder automatically always facing the user and thus ensures optimum user-friendliness. The column has been specially optimised for transport on Euro pallets. The delivery to the installation site can be carried out very easily and efficiently.

Manufactured from high-quality aluminium, the powder-coated surface of the column surface not only gives the column an aesthetic touch, but also makes it very robust and ensures a long service life.

The advantages at a glance

- // Compatible with KeContact P30 and P40
- // Single or double mounting
- // Barrier-free operating height
(in accordance with legal requirements*)
- // Plug holder always facing the user due to special design
- // Optimised for Euro pallets for efficient transport
- // Base plate hole pattern identical to the KC-P30 uprights
- // Compatible with existing foundations and the base plate for indoor use

Product details:

- // Material: Aluminium AW6060
- // Surface: Powder-coated
- // Colour: RAL 7016
- // Including plug/cable holder
- // Including mounting material & ground anchor

* The mounting height of the wallboxes on the pedestal fulfils the legal requirements for accessibility in accordance with standard EN 301 549.

KeContact pedestal

Installation examples

Pedestal single

For mounting **one** charging station.

- 1x KeContact P30,
- 1x KeContact P40

Pedestal double

For the installation of **two** charging stations.

- 2x KeContact P30,
- 2x KeContact P40,
- 1x KeContact P30 + 1x KeContact P40
